Subject: Springpole Gold Project - Planning for Final EIS/EA Submission

CAUTION -- EXTERNAL E-MAIL - Do not click links or open attachments unless you recognize the sender.

Good Morning,

First Mining Gold has proposed to develop, operate, and decommission / close an open pit gold and silver mine with supporting facilities known as the Springpole Gold Project (Project). The Project is in a remote area of northwestern Ontario, approximately 110 kilometres (km) northeast of the Municipality of Red Lake and 145 km north of the Municipality of Sioux Lookout. The Project is subject to the federal and provincial environmental assessment (EA) processes. Guidelines for the federal EA were issued in 2018 and the Terms of Reference for the Provincial EA were issued in 2021. A comprehensive draft Environment Impact Statement / Environmental Assessment document was shared in May 2022 and has been consulted on over the course of more than 2 years leading up to the final submission.

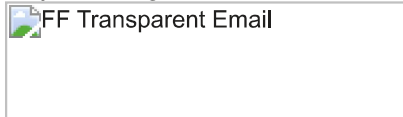

First Mining Gold is preparing for submission of the final Environment Impact Statement / Environmental Assessment document at the end of October. You have been identified as part of the government review team and a key contact for your ministry, and I am therefore reaching out to notify you of the planned submission and confirm your interest in reviewing the Environment Impact Statement / Environmental Assessment document. The document is planned to be shared electronically; if you would like to receive a hardcopy or USB, please let me know.

Please let me know if there is an alternate or additional contact from your Ministry that should be included on the circulation.

Thank you,

Meghan Bertenshaw MES, BSc.
Project Manager, Environmental Assessment and Permitting
